PLEASE NOTE:	
<i>Not all vendors have the same product selection. The variety of infant formulas & nutritional supplement products available from vendor to vendor can differ.</i>	
Some vendors have a very limited selection of only the more commonly used formulas & nutritional supplements and often have those products available for prompt delivery.	
Other vendors have a broad selection of formulas/nutritional products that they are able to obtain but keep a low inventory, place special orders with wholesalers as needed and are not always able to have all those products available for prompt delivery.
